ContentMine

THE SCALE OF THE TASK

- ~ 27,000 peer reviewed journals*
- > 5,000 publishers
- ~ 3,000 new papers per day
- “costing” 15 Billion USD to publish
- Representing 500 Billion USD of research

Spotted seal

Animal

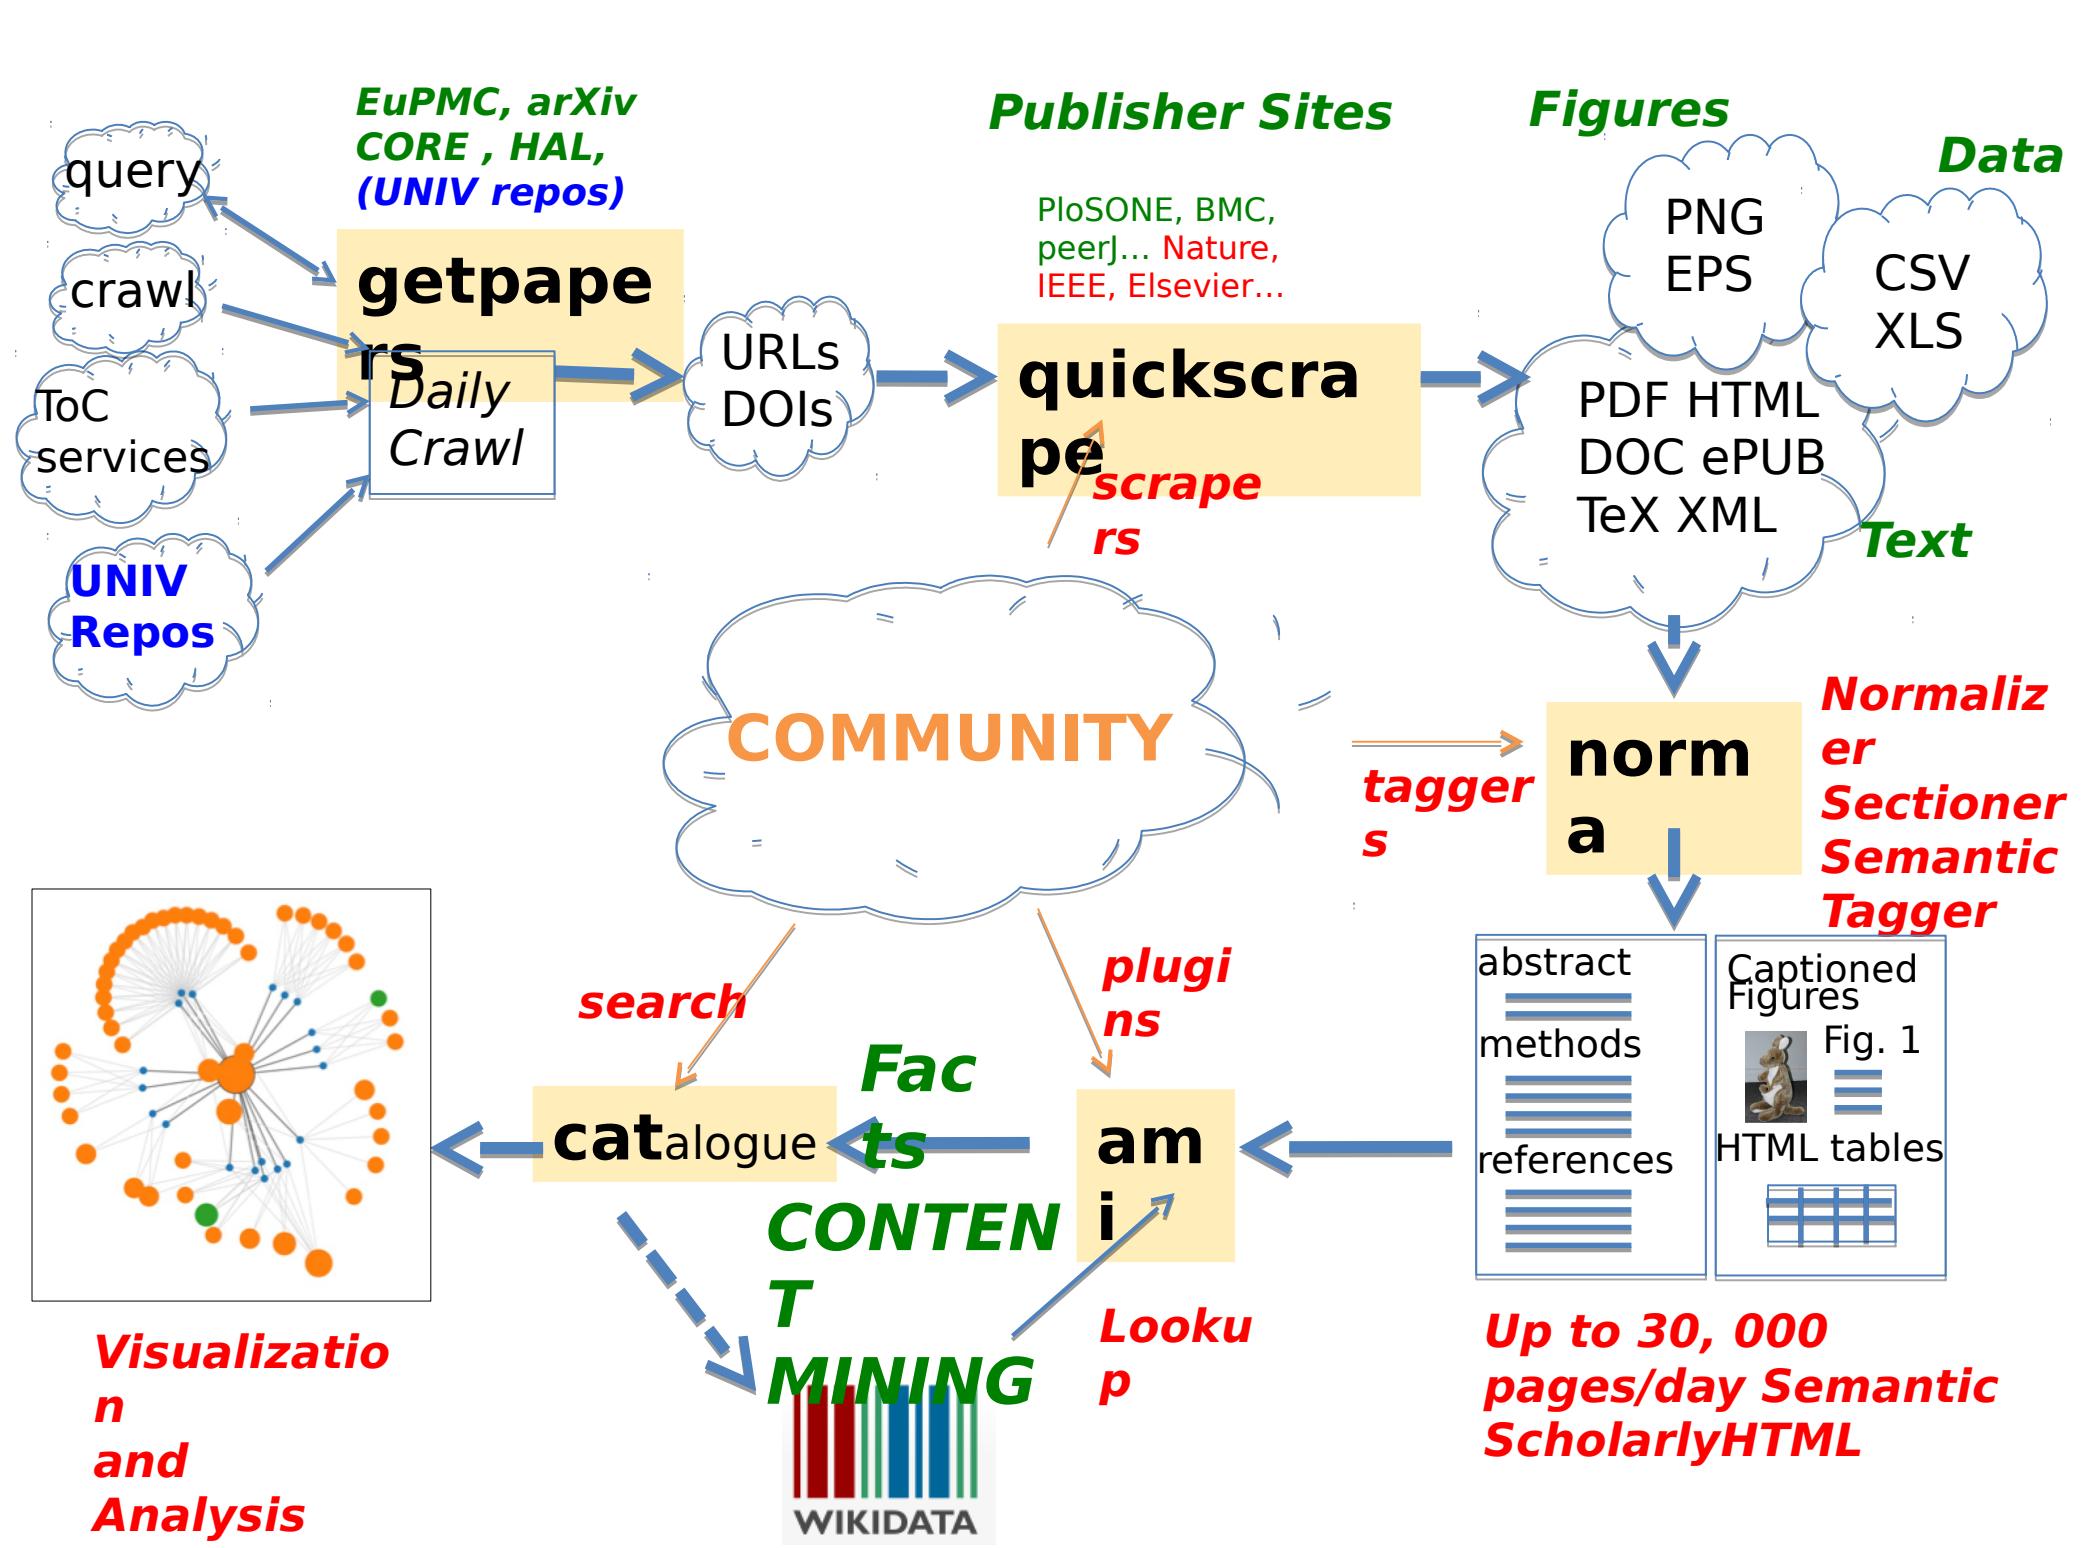

The spotted seal, also known as the larga or largha seal, is a member of the family Phocidae, and is considered a "true seal". It inhabits ice floes and waters of the north Pacific Ocean and adjacent seas. [Wikipedia](#)

Scientific name: *Phoca largha*

Higher classification: *Phoca*

HACK WITH FACTS

What have you found?

WORLD CAFE

SHUTTLEWORTH
FUNDED

1. Get in groups (4-5 people)
2. 3 rounds (discuss and document)
3. Harvest in Circle

Questions:

1. What kind of questions could the data from the hacking session answer in terms of transparency and collaboration?

2. What are the opportunities you see in ContentMining on a massive scale? Think big!

3. What challenges do you see for ContentMining?
